LOHITH K

B.E. Computer Science & Engineering (Cyber Security) Student · Coimbatore, Tamil Nadu, India

lohithgamer12@gmail.com | lohith-portfolio-ten.vercel.app | github.com/Amulpappu | linkedin.com/in/lohith-k-b1331a3a8

SUMMARY

First-year Cyber Security student who builds and ships working software: Discord automation with an admin dashboard, an Android expense tracker, and an AI crop-disease screening app. Comfortable across Python, TypeScript and Kotlin, from backend APIs to mobile and web front ends. Looking for software engineering and cyber security internships.

EDUCATION

Rathinam Technical Campus, Coimbatore — 2026 – Present
B.E. Computer Science and Engineering (Cyber Security) · Semester 1

Srividyalayam Matric Hr. Sec. School, Madurai — Completed 2026
Class 12 (HSC), Computer Science group · Tamil Nadu State Board

PROJECTS

Jiraiya Bot Monitor — Mechanic shop management & admin panel — GitHub
Python · discord.py · Flask · Tesseract OCR · Google Sheets API (gspread) · Render

- Discord bot that reads service, kit and invoice messages, including screenshots via OCR, and logs them to Google Sheets, skipping duplicates.
- Flask web dashboard with login and role-based access (Admin / Manager / Employee) for employees, transactions, inventory and audit logs.
- Kit and service pricing helpers; bot and dashboard run together as one service deployed on Render.

AgriGuard — AI crop disease detection for Indian farmers — GitHub
Next.js · Tailwind CSS · FastAPI · SQLAlchemy · Supabase · Docker

- Mobile-first web app that screens a photo of a leaf for diseases, pests, nutrient problems and stress across 14+ Indian crops.
- Confidence policy that withholds results when the model is unsure and refers the farmer to an expert; no chemical prescriptions.
- Submitted to the Seva First Innovation Challenge (SFIC) 2026.

SpendWise — Android bank & UPI expense tracker — GitHub
Kotlin · Android · Firebase Authentication · Google Sheets sync

- Reads bank and UPI SMS alerts on-device to track transactions and running balances offline; data stays on the phone.
- Generates password-protected PDF and Excel account statements and syncs each user's ledger to Google Sheets.

Manjummel — All-rounder Discord bot — GitHub
Python · discord.py · Pillow

- Music player with button controls, welcome cards, invite tracker, server stats, and moderation commands with audit logs.

Moonlight ML Workshop — Real-time machine learning in the browser — GitHub
JavaScript · ml5.js · p5.js · Google Teachable Machine

- Three webcam/microphone apps (image, audio and pose recognition) using models I trained with Teachable Machine.

SKILLS

Languages	Python, TypeScript, JavaScript, Kotlin, HTML/CSS
Web & backend	React, Next.js, Vite, Tailwind CSS, FastAPI, Flask
AI & automation	Discord bots (discord.py), OCR (Tesseract), ml5.js, Teachable Machine, Google Sheets API
Data & cloud	PostgreSQL, Supabase, Firebase, Docker, Vercel, Render, Oracle
Productivity	Microsoft Excel, Google Sheets (spreadsheets)
Tools	Git, GitHub, Antigravity
Creative	Blender, Adobe After Effects, Runway

COMPETITIONS

- **Vishwakarma Awards 2026–27** — CurrentGuard AI (Sustainable Energy · Smart Grids): Stage 2, Design Development.
- **Seva First Innovation Challenge (SFIC) 2026** — AgriGuard: Submitted.
- **IndiaSkills Competition 2026–27 (Tamil Nadu)** — Registered, team-skill entry.
